

# CodePlex Archive will be shut down after July 1st, 2021.

CodePlex was Microsoft's free, open source project hosting site, which ran from 2006 through 2017. The site has been in archive mode for 3 years. We now encourage customers to use [Github](#) for their open source project hosting needs.

CodePlex will continue as an archive until next July (2021), at which point it will be shut down. Until then, you can browse published projects, documentation, issues, and discussions which were posted before the site went into archive mode three years ago.

For questions or comments please contact [CodePlex Archive support](#).

---

In a SharePoint document library during upload this feature - if activated at Web level - extracts the title of a PDF file and stores it in the "Title" field of the list item.

Two projects included:

- for SP 2010
- for SP 2013

Created with VS2012.

Details @ my blog: <http://blog.karstein-consulting.com/2013/02/26/pdf-upload-metadata-extractor-sample-sharepoint-2013-2010-project-on-codeplex/>

It uses iTextSharp v4.1.6 under GNU Lesser Public Licence (LGPL).
